

Performance Test Engineer

Enea (formerly Openwave Mobility) develops the next generation of Mobile Internet Technology, enabling Telecom Operators to provide a first-class user experience to mobile subscribers on data networks.

The Belfast office plays a pivotal role in the delivery of both the Traffic Management and Cloud Data Management solutions, and we are currently seeking an enthusiastic and motivated Performance Test Engineer to join our dynamic team in Belfast.

Essential Criteria

- BSc degree in Computer Science, Engineering or equivalent relevant to Quality Engineering
- 4+ years' experience in a Quality Engineering role with a proven track record in delivering quality software
- At least 1 year's experience in a Load/Performance Testing role
- Excellent problems solving skills with a strong technical focus
- Demonstrable experience working in Java/C++ server applications
- Knowledge of Web Technologies
- Strong team player
- Working knowledge of Unix/Linux operating system environments

Desirable Criteria

- Demonstrable Test Automation experience
- Awareness of Mobile Telecom technologies

Company Benefits include:

- Group Pension Plan with employer contributions
- Full sick pay for up to 26 weeks
- Private health insurance; market leading 75% salary in the event of prolonged or serious illness
- Bupa Private Medical – Family Cover
- Death in service benefit – 3x salary
- Annual bonus plan
- Cycle to work
- Subsidised social event
- Subsidised car parking

Please ensure you attach an up-to-date CV, detailing how you meet the essential criteria for this role and send to caroline.cunningham@enea.com

Enea is an Equal Opportunities Employer
